

Frontend Bugs and Validations Testing

- I signed with using ruwan@gmail.com and for password, I used password123. Then, browse a tool and booked it for one day.(pick-up date 2026/03/07, return date 2026/03/07).And selected “finalize and place booking order” button. All calculations are showed in real time. (days × daily rate).

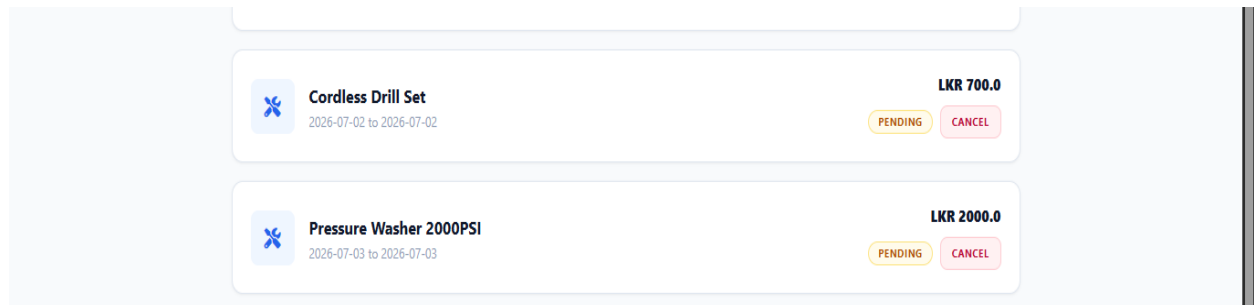

The screenshot shows a 'Confirm Rental Details' form. At the top, there is a section for the rental item: 'Pressure Washer 2000PSI' with a small icon of the washer and the word 'Cleaning' below it. Below this, there are two date pickers: 'PICK-UP DATE' and 'RETURN DATE', both set to '07/03/2026'. Underneath the dates, there is a summary table with three rows: 'Daily Rate' (Rs. 2000.0), 'Total Duration' (1 Days), and 'Estimated Cost' (Rs. 2000.00). At the bottom of the form is a large blue button labeled 'Finalize & Place Booking Order'.

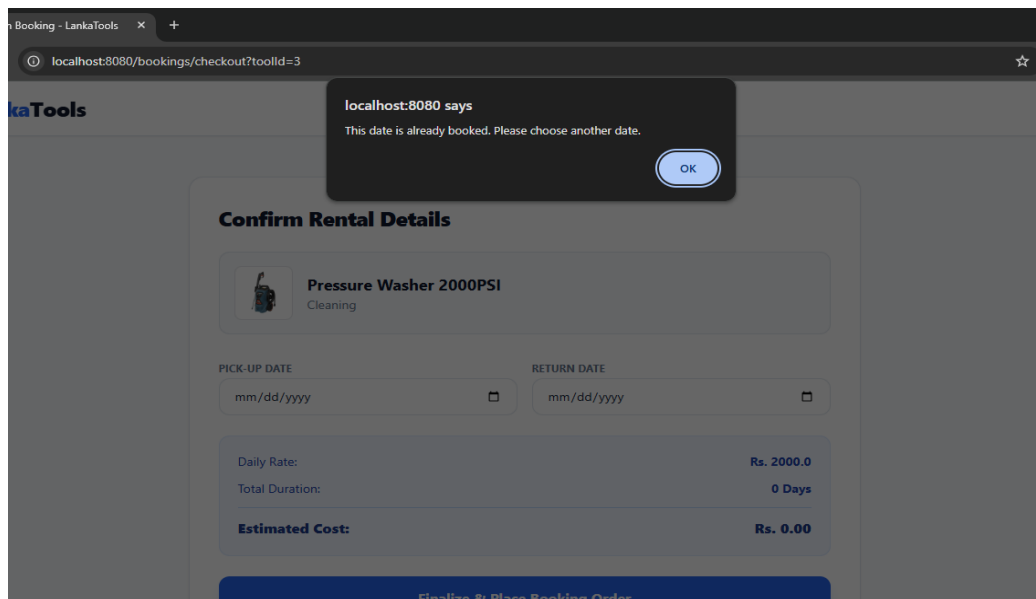

- Pop-up alert message will appear to verify when customer booked a tool. This pop-up will notify them booking is successfully created and if customer want to cancel it, he may cancel the order within two hours.

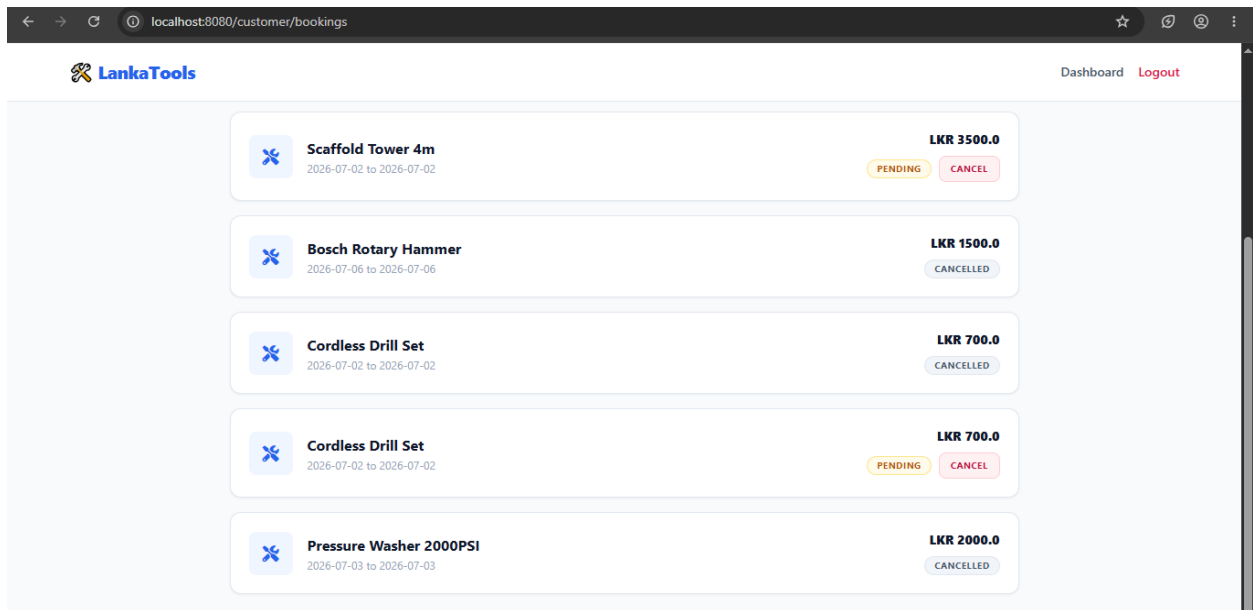

- This screenshot displays the customer's booking list, including the booking status, which progresses through the following stages: Pending → Confirmed → Active → Returned, based on the shop owner's approval process. It also includes a Cancel button, allowing customers to cancel their bookings when applicable.

- A pop-up alert is displayed when a customer attempts to book a tool that has already been reserved for the same date range. This pop-up was used to verify the date overlap validation, ensuring that duplicate bookings for the same tool during the same period are prevented.

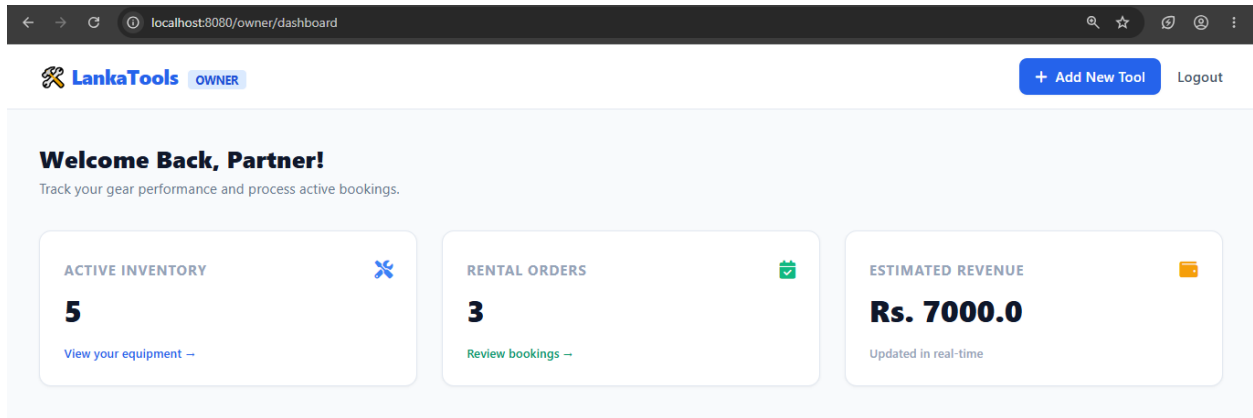

- When a customer cancels a booked tool, the booking status is updated to Cancelled and is displayed accordingly in the customer's booking list.

- Additionally, the owner's incoming bookings list displays a Cancelled status badge to indicate that the customer booked the tool but subsequently canceled the booking.

- This screenshot shows the owner's dashboard for the account ahmed@shop.com. It displays the total number of equipment items available in the inventory, the number of incoming rental orders, and the estimated revenue, which is calculated in real time based on confirmed bookings.

- Moreover, the functionality was verified by canceling the booking for the Bosch Rotary Hammer. As a result, the number of incoming rental orders and the estimated revenue on the owner's dashboard were updated successfully in real time.
